- Professional appearance according DIN 2403
- Fast access to information on the pipe medium
- Various fixing options
- Easy installation
- Scratch resistant and withstands temperatures up to +130 °C
- Durable commercial exposure

BIS IKS-2000® Pipe Identification System

Why place identification on pipes?

The identification of pipe contents in piping installations is getting more and more significant. In case of emergency it is important to have quick access to the information about the contents and possible flow direction of the pipes involved. In addition, pipe identification makes the installation easier to access for quick maintenance.

On-the-spot commercial exposure

BIS IKS-2000® is a personal and professional solution for pipe identification. As well as the information about the contents of the pipe, contractors can have their name, logo and additional information printed on the cards.

Fixing options

BIS IKS-2000® Text Card Holders and Accessories

Colours BIS IKS-2000® Text Cards

Dimension	white	green	blue	red	grey	yellow	brown	orange	violet	black
86 x 54 mm	020 0 101	020 0 102	020 0 103	020 0 104	020 0 105	020 0 106	020 0 107	020 0 108	020 0 109	020 0 110

Text card colours according DIN 2403

Green: water; blue: oxygen; red: steam; grey: air; yellow: flammable gases; brown: flammable liquids; orange: acids; violet: leach; black: non flammable gases, non flammable liquids.

Do-it-yourself labelling

BIS IKS-2000® is designed to work with plastic cards (PVC) of credit card format. You can easily meet the DIN standard by placing the correct identification to the coloured text card using a Dymo labelprinter for example.

Additionally a BIS IKS-2000® Card Holder Transparent Cover Plate (020 0 032) is available, which allows a printed paper card from a desktop printer to be placed behind it.
