

Proven to save
fixing time!

BIS RapidRail®

Light Rail Fixing System

Inspired by smart solutions from the start

Walraven is a globally active company in the installation industry, founded in 1942. We have always been dedicated to make the work of our customers easier and more effective. With simple and smart solutions, comprehensive services and excellent support.

Walraven. The value of smart

BIS RapidRail®

A light rail alternative to strut

RapidRail® is our unique light rail fixing system that we developed as a lightweight, easy to install alternative to traditional strut. For many installations like standard plumbing and heating pipework, ventilation pipes and cable trays, heavy and bulky 41x41 strut is not required.

Benefits of using a lighter rail

Using a lightweight alternative can provide many benefits including:

- **Easier to install** – especially when used in overhead applications, a lighter rail is easier to handle, and is less likely to result in accident or injury.
- **Easier to store and transport** – as well as being lighter, our RapidRail® is available in 2m lengths which makes it easier to store, carry and transport.
- **Environmental benefits** – a light rail is more environmentally friendly as it uses less steel.
- **Fast-fit accessories for faster installation** – with a full range of fast-fit accessories, installations can be made a lot quicker than with traditional strut systems, saving hours or even days on the jobsite.

BIS RapidRail® system

Features and benefits

Complete range of rail and accessories

- Our BIS RapidRail® system includes a complete range of lightweight rails plus accessories such as cantilever arms, rail connectors, hammerfix and slide nuts, ball swivels and more. All to help you make faster installations.

Proven to save up to 40% installation time

- The beauty of this system is the fast-fit accessories. You do not need to use any loose nuts, bolts and washers to assemble this rail system as the pre-assembled slide nuts replace these individual pieces saving you valuable installation time.

Suitable for a range of installations

- BIS RapidRail® is ideal for heating and plumbing pipework, cable trays, air ducts, ventilation channels and more.

RAL approved quality

- The system has a RAL quality mark which means it has been independently tested and certified as a system to guarantee quality, reliability and safety in construction.

Prefabrication service

- To save you even more time on site for larger installations, we offer a prefabrication service.

Technical design support

- Our Technical Support Team offer BIS RapidRail® solutions such as trapeze frames with calculations to demonstrate suitability for the installation requirements.

*Lightweight,
fast-fit rail system*

Save hours on your installations

The unique benefit of the BIS RapidRail® system is the time-saving gained from the pre-assembled slide nuts. Instead of using loose nuts, bolts and washers, our pre-assembled slide nuts and hammerfix are 3in1 parts that simply push and twist into the rail. No messing around with loose parts!

Installation – insert, lock, done!

Case study installation

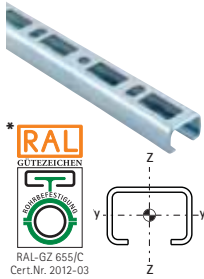

Craig at CR Plumbing and Heating is a self-employed plumbing and heating engineer who has been using BIS RapidRail® to install heating and hot water system conversions like the one below. He told us he saved hours on this installation due to the time-saving hammerfix and slide nuts.

"This system has been a great discovery for me! The benefit of not having to use loose nuts, bolts and washers is a huge time-saver on larger installations. The other accessories that come with this rail are also great, making it really versatile. The cantilever arms allow pipes to be run at multiple depths against the wall with ease."

Fixing rails and cantilever arms

The right combination

2S clamps

With the 2S Walraven offers a standard lined clamp to fix uninsulated steel, copper and multilayer pipes Ø 10 mm up to and including Ø 225 mm. The gapless range has an optimised steel design and provides a solution for every medium load in accordance to RAL GZ-655.

Anti-loss washers prevent screws from falling out

WCS Concrete Screws

6253006

The WCS1 are suitable for overhead installations and for use with Walraven rail systems. They can be used with a variety of substrates including hollow core slabs, whilst offering outstanding performance in cracked and non cracked concrete. These products have additional anti-corrosion coating and are tested for fire resistance and for seismic installations. Full details can be found on the ETA certificate.

Suitable for a wide range of installations and substrates
