

WDI1 Drop-in Anchor SSt

(M 95 21)

standard stainless steel drop-in anchor

Features and benefits

- simple and quick installation procedure
- medium load capacity
- made of stainless steel for use in external atmospheric environment
- no collar for anchor setting at greater hole depth
- material: stainless steel
- ETA ETAG001 Part 6 approval for multiple use for non-structural applications
- fire resistance class R30-R120 for design of anchorages under exposure to fire (M8-M16)
- substrate type:
  - cracked concrete
  - non-cracked concrete

\* Recommended loads: are stated for multiple use for non-structural applications according to ETAG001, Part 6; apply to anchors correctly installed at maximum embedment depth; include partial safety factor and an overall partial safety factor for action of 1.4.  
The partial safety factor for action depends on the type of loading and shall be taken from national regulations. All anchor failure modes and the entire relevant product European Technical Assessment must be considered for anchor design.
