

WIS Chemical Anchor WVSF200W

(L 03 92)

high performance chemical anchoring system for cracked concrete; fast-hardening formulation for cold weather

Features and benefits

- fast-hardening formulation for installation in cold weather conditions
 - reduced distances between anchors and from the edge of the substrate
 - always the correct mixing ratio thanks to the appropriate design of the mixer
 - the cartridge can be used many times (the mixer should be replaced each time)
 - can be used in applications requiring class C1 seismic resistance
 - approved for use with threaded rods and studs in cracked and non-cracked concrete
- ETA Option 1 approval for cracked and non-cracked concrete
 - substrate type:
 - cracked concrete
 - non-cracked concrete
