

Pacifyre® IWM III Fire Strip

(U 04 20)

for penetrations of insulated or non-insulated flammable pipes and multi-layer pipes

Features and Benefits

- Fire Strip for plastic (combustible) pipes and pipe systems. For apertures in walls (solid walls or light partition walls) and ceilings with fire protection requirements in accordance with UK Legislation
- no tools, drilling or extra fixing materials needed
- only 1 roll for numerous penetrations
- easily to build in: simply place the roll around the pipe, slide into the aperture, finished!
- suitable for damp conditions
- minimum of layers required, so a smaller drillhole is possible
- suitable for areas which are difficult to access, like corners
- problem solver: easy on-site modification
- maintenance free
- zero distance is possible between fire collars
- high flexibility due to self-adhesive strip
- tested according to EN 1366-3
- European approval: ETA-18/0918
