

WTB1 Throughbolt Anchor SSt

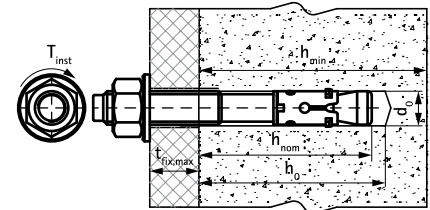

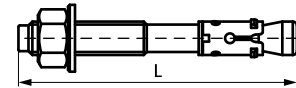

(M 95 22)

high performance stainless steel expansion anchor for cracked concrete

Features and Benefits

- high load capacity
- pre- and through-fixing
- made of stainless steel for use in external atmospheric environment
- two embedment depths provide installation flexibility
- ETA Option 1 approval for cracked and non-cracked concrete
- fire resistance class R30-R120 for design of anchorages under exposure to fire
- material: stainless steel, A4
- substrate type:
 - cracked concrete
 - non-cracked concrete
 - stone

* Recommended loads: are stated for single anchors; apply to anchors correctly installed at maximum embedment depth; include partial safety factor and an overall partial safety factor for action of 1.4.
 The partial safety factor for action depends on the type of loading and shall be taken from national regulations. All anchor failure modes and the entire relevant product European Technical Assessment must be considered for anchor design.
 For more information, please refer to the ETA report.
