WDI1R Drop-in Anchors

Reduced-length drop-in anchor with a lip collar

Anchor types

WDI1R 6x25 WDI1R 8x25 WDI1R 10x25 WDI1R 12x25 The WDI1R reduced-length drop-in anchors are easy to install deformation-controlled anchors for medium loads. They are approved for multiple use for nonstructural applications in cracked and non-cracked concrete and in precast prestressed hollow core slabs.

Features and benefits

- ETA ETAG001 Part 6 approval for multiple use for non-structural applications
- Reduced 25mm anchor length allows approved applications in precast prestressed hollow core slabs
- Collar with a lip for flush anchor setting at any hole depth

Approvals and certificates

- European Technical Assessment
- Fire Test Report

Simple and quick installation procedure

- Medium load capacity
- Fire resistance class R30-R120 for design of anchorages under exposure to fire

ETA-17/0623, 7 September 2017 ETA-17/0623, 7 September 2017

Suitable base materials

- Non-cracked concrete C12/15; C16/20 and C20/25 to C50/60
- Cracked concrete C12/15; C16/20 and C20/25 to C50/60
- Precast pre-stressed hollow core slabs C30/37 to C50/60
- Fire-exposed concrete C20/25 to C50/60

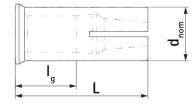

Typical applications

- Rail and pipe support systems
- Curtain walls
- Racking
- Machinery

Product details

| Article Description | | Size | Length | External diameter | Inner thread Iength |
|---------------------|-------------|------|--------|-----------------------|------------------------|
| | | [-] | [mm] | d _{nom} [mm] | l _g [mm] |
| 6103206 | WDI1R 6x25 | M6 | 25 | 8 | 12 |
| 6103208 | WDI1R 8x25 | M8 | 30 | 10 | 12 |
| 6103210 | WDI1R 10x25 | M10 | 40 | 12 | 12 |
| 6103212 | WDI1R 12x25 | M12 | 50 | 15 | 12 |

Packaging details

| Article | Description | F | Pack 1 | Pack 2 | | |

Mechanical properties

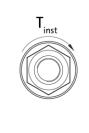

| Anchor Type | WDI1R |
|---|--|
| Material | Cold formed or machining steel, zinc plated, EN ISO 4042:1999 |
| Fastener screw or threaded rod material | Steel, property class \geq 4.8 according to EN ISO 898-1:2013 or EN-ISO 898-2:2012, thickness of galvanizing > 5µm |

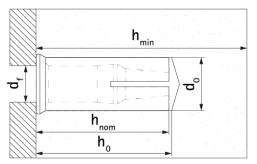

Installation parameters for concrete

| Anchor Type | | | | WD | I1R | |
|---|--------------------|------|----|-----|-----|-----|
| Anchor size | | | M6 | M8 | M10 | M12 |
| Anchor length | L | [mm] | 25 | 25 | 25 | 25 |
| Drill hole diameter | d ₀ | [mm] | 8 | 10 | 12 | 15 |
| Depth of drill hole | h ₀ | [mm] | 25 | 25 | 25 | 25 |
| Nominal embedment depth | h_{nom} | [mm] | 25 | 25 | 25 | 25 |
| Minimum screwing depth | l _{s,min} | [mm] | 6 | 8 | 10 | 12 |
| Maximum screwing depth | l _{s,max} | [mm] | 12 | 12 | 12 | 12 |
| Installation torque | Tinst | [Nm] | 4 | 8 | 15 | 35 |
| Diameter clearance of hole in the fixture | df | [mm] | 7 | 9 | 12 | 14 |
| Minimum concrete member thickness | h _{min,1} | [mm] | 80 | 80 | 80 | 80 |
| Minimum edge distance | Cmin | [mm] | 60 | 100 | 100 | 130 |
| Minimum anchor spacing | S_{min} | [mm] | 30 | 70 | 70 | 100 |
| Standard concrete member thickness | h _{min,2} | [mm] | 80 | 80 | 80 | 80 |
| Minimum edge distance | C_{min} | [mm] | 60 | 100 | 100 | 110 |
| Minimum anchor spacing | S_{min} | [mm] | 30 | 50 | 60 | 100 |

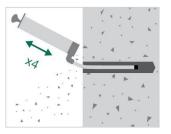

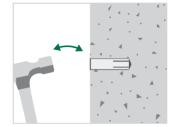

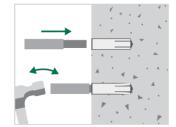

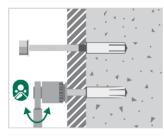

Instructions for installation in concrete

Recommended loads for multiple use for non-structural applications in concrete for single anchors¹⁾

| Anchor Type | | | | WE | DIR | |
|--|------------------|------|------|------|------|------|
| Anchor size | | | M6 | M8 | M10 | M12 |
| Concrete C12/C15 | | | | | | |
| Recommended load in all directions | Frec | [kN] | 1.19 | 1.19 | 1.67 | 1.67 |
| Concrete C20/25 to C50/C60 | | | | | | |
| Recommended load in all directions | F _{rec} | [kN] | 1.67 | 1.90 | 2.14 | 2.14 |
| Characteristic edge distance | Ccr | [mm] | 38 | 38 | 38 | 38 |
| Characteristic anchor spacing distance | Scr | [mm] | 75 | 75 | 75 | 75 |

1) Single anchors are anchors not affected by concrete edge and anchor spacing influence.

2) Recommended load includes partial safety factor and an overall partial safety factor for action of 1.4. The partial safety factor for action depends on the type of loading and shall be taken from national regulations. All anchor failure modes and the entire relevant product European Technical Assessment must be considered for anchor design.

Characteristic values of resistance under fire exposure in C20/25-C50/C60 concrete¹⁾

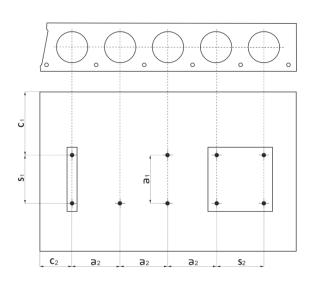

| Anchor Type | WDI1R | | | | | | | |
|---------------------|------------------|--------------------|-------|------------------------------------|------|-----------------|------|--|
| Anchor size | M6 | M8 | M10 | M12 | | | | |
| All load directions | | | | | | | | |
| R30 | | | | 0.40 | 0.60 | 0.60 | 0.60 | |
| R60 | Characteristic | Γ | [LNI] | 0.35 | 0.60 | 0.60 | 0.60 | |
| R90 | resistance | F _{Rk,fi} | [kN] | 0.30 | 0.60 | 0.60 | 0.60 | |
| R120 | | | | 0.25 | 0.50 | 0.50 | 0.50 | |
| R30-R120 | Spacing distance | S _{cr,fi} | [mm] | | 4 x | h _{ef} | | |
| R30-R120 | Edge distance | C _{cr,fi} | [mm] | 2 x h _{ef} ²) | | | | |

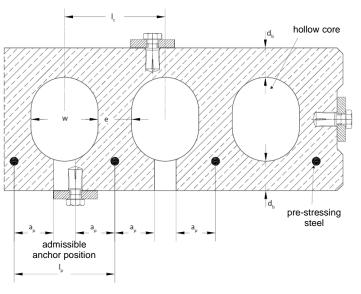

1) In absence of other national regulations the partial safety factor for resistance under fire exposure $\gamma_{M,fi} = 1,0$ is recommended 2) If the fire attack is from more than one side, the edge distance of the anchor has to be ≥ 300 mm and $\geq 2 \times h_{ef}$

Installation parameters for precast pre-stressed hollow core slabs

| Anchor Type | | | | WD | I1R | |
|---|----------------|------|-----|-----|-----|-----|
| Anchor size | | | M6 | M8 | M10 | M12 |
| Minimum edge distance | C_{min} | [mm] | 150 | 150 | 150 | 150 |
| Minimum anchor spacing | S_{min} | [mm] | 200 | 200 | 200 | 200 |
| Flange thickness ¹⁾ | db | [mm] | 35 | 35 | 35 | 35 |
| Core distance | lc | [mm] | 100 | 100 | 100 | 100 |
| Pre-stressing steel distance | lp | [mm] | 100 | 100 | 100 | 100 |
| Distance between anchor positions and pre-stressing steel | a _p | [mm] | 50 | 50 | 50 | 50 |

1) The anchor may be set in a flange thickness of 30mm if the drill hole does not cut into the hollow core.

Recommended loads for multiple use for non-structural applications in precast pre-stressed hollow core slabs for single anchors¹⁾

| Anchor Type | WDIR | | | | | |
|---|------|------|------|------|------|------|
| Anchor size | | | M6 | M8 | M10 | M12 |
| Precast pre-stressed hollow core slabs C30/37 to C50/60 | | | | | | |
| Recommended load in all directions | Frec | [kN] | 1.67 | 1.90 | 2.14 | 2.14 |
| Characteristic edge distance | Ccr | [mm] | 150 | 150 | 150 | 150 |
| Characteristic anchor spacing distance | Scr | [mm] | 200 | 200 | 200 | 200 |

1) Single anchors are anchors not affected by concrete edge and anchor spacing influence. 2) Recommended load includes partial safety factor and an overall partial safety factor for action of 1.4. The partial safety factor for action depends on the type of loading and shall be taken from national regulations. All anchor failure modes and the entire relevant product European Technical Assessment must be considered for anchor design

The definition and requirements of multiple use for non-structural applications

The definition of multiple use according to the Member States is given in ETAG 001 Part 6, Annex 1. In the absence of a definition by a Member State the following default values may be taken:

| Minimum number of fixing points | Minimum number of anchors per fixing point | Maximum design value of actions per fixing point |
|---------------------------------|---|---|
| [n 1] | [n ₂] | [N ₃] |
| 3 | 1 | 2.0 kN |
| 4 | 1 | 3.0 kN |

The maximum design value of actions per fixing point might be increased if in the design it is shown that the requirements on the strength and stiffness of the fixture in the serviceability and ultimate states after the failure of one anchor are fulfilled.

Design method for anchorages for multiple use for non-structural applications

The design of the fixture is such that, in the case of excessive slip or failure of one anchor, the load can be transmitted to neighbouring anchors without significantly violating the requirements on the fixture in the serviceability and ultimate limit state.

For example the design of the fixture may specify the number n1 of fixing points to fasten the fixture and the number n2 of anchors per fixing point. Furthermore by specifying the design value of actions N_{Sd} on a fixing point to a value $\leq n_3$ (kN) up to which the strength and stiffness of the fixture are fulfilled and the load transfer in the case of excessive slip or failure of one anchor need not to be taken into account in the design of the fixture.
