

Technical manual

Walraven Pacifyre® MWB System 2 x 50 mm

Ablative mineral fibre board seal

Mixed penetration sealing system made of mineral fibre boards and an ablative coating for electrical installations of all types as well as for electrical installation conduits, combustible/non-combustible pipes and further services.

Fire resistance class max. EI 120 in accordance with EN 13501-2 as per ETA-24/1116.

Technical manual

Walraven Pacifyre® MWB System 2 x 50 mm

1. Preliminary remarks / overview

1.1 Target group

The installation instructions are intended solely for personnel trained in fire protection.

1.2 Use of the instructions

Before starting work, read through these installation instructions completely once. Pay particular attention to the following safety instructions.

The authorisation holder assumes no liability for damage caused by failure to comply with these instructions.

Pictorial representations serve as examples only. Installation results may differ in appearance.

Unless stated otherwise, all lengths are specified in mm.

All information in this document represents the state of the art at the time of writing or the current version of the standard.

Upon request, Walraven will be pleased to provide the relevant legal and technical framework and manufacturer specifications for each individual case.

1.2.1 Safety instructions

Consult the respective safety information for the individual penetration seal components.

Personal protective equipment:

	Wear protective clothing and non-slip shoes.
---	--

	Use safety goggles, safety glasses.
---	-------------------------------------

	P2 particle filter in case of short-term or low level exposure. Use breathing protection in compliance with international/national standards.
---	--

	Use chemically resistant gloves. Recommended materials: butyl rubber, nitrile rubber, fluorinated rubber, PVC.
---	---

Safety instructions for the installation of floor penetration seals:

	The area below the floor penetration seal must be cordoned off against entry during penetration seal work (barrier tape and warning sign: warning of possible falling objects, do not enter the area, penetration seal work in floor openings).
---	---

	The contractor for the production of floor penetration seals must inform the client in writing (for forwarding to the client or appointed representative) that after the production of the fire penetration seals in floors, these must be secured on site against loads, in particular against being stepped on, by suitable measures (e.g. by fencing or by covering with grating).
---	---

Technical manual

Walraven Pacifyre® MWB System 2 x 50 mm

1.3 Building elements

Cladding of the aperture edge in plasterboard walls

Alongside the opening edge, corresponding to the wall panelling, with at least two layers of 12.5 mm cement or gypsum-bound building boards with a reaction to fire of class A1 or A2 according to EN 13501-1.

Plasterboard walls

Plasterboard walls must have a minimum thickness of ≥ 100 mm.

The cladding of the aperture edge must consist of at least one layer with a thickness of ≥ 12.5 mm. When installing without cladding the seal size may not be larger than 800 x 600 mm or 600 x 800 mm.

Plasterboard walls with timber studs must be declared and installed with at least the same number of layers as tested. The distance between the opening and the studs and transoms must be ≥ 100 mm. The gap between seal and stud / timber girt is sealed with an insulation of at least 100 mm, reaction to fire class A1 or A2 according to EN 13501-1.

If one or more studs must be cut to install the seal, horizontal girts must be installed.

Standard plasterboard wall construction is not applicable for construction on the basis of sandwich panels or for plasterboard walls with one-sided cladding (shaft walls).

The supporting structure must have the required fire resistance rating according to EN 13501-2.

Solid walls

Made of concrete or masonry with a density of ≥ 350 kg/m³.

The walls must be classified for the desired fire resistance duration according to EN 13501-2.

Solid floors

Made of concrete or masonry with a density of ≥ 550 kg/m³.

The floors must be classified for the desired fire resistance duration according to EN 13501-2.

Timber walls and floors

Made of cross laminated timber (CLT) by the manufacturer STORA ENSO.

Wall: thickness 100 mm / layers: 30/40/30

Floor: thickness 140 mm / layers: 40/20/20/20/40

A wall or floor of cross laminated timber can be regarded as equivalent to the tested wall and floor if the following requirements are met.

- The construction of the wall/floor is identical.
- The fire resistance class of the wall/floor is identical or higher.
- The construction is certified as per EN 13501-2.
- The construction is based on the same solid wood panels as tested.
- The solid wood panels are of the same building material category as tested or of a better category.
- The strength class of the solid wood panels as per EN 338 is equivalent to the class of the tested panels or a higher class.
- The mass burning rate of the solid wood panels as per EN 1995-1-2 is equivalent to the class of the tested panels or a higher class.
- The thickness of the solid wood panel is at least equivalent to that of the tested panel.

Since particularly critical walls and floors were tested with this construction, we are also able to offer our sealing systems for timber components by other manufacturers, such as KLH, Mayr-Melnhof, Binderholz et al. Our technical service will be glad to assist you with any enquiry.

Sandwich panel walls

Sandwich panel walls PAROC AST-S/F with a thickness of ≥ 120 mm.

Technical manual

Walraven Pacifyre® MWB System 2 x 50 mm

2. Allowed services

For specific fire resistance classes and pipe end configurations depending on measurements and fire protection measures see the respective chapters on design variants starting on page 17.

2.1 Cables / electrical installation conduits / wave guides / speedpipes

Service	Max. diameter [mm]		
	Cables		≤ 80
	Cable bundles		≤ 100, cable Ø ≤ 21
	Cable trays		✓
	Single conduits	made of plastic	≤ 16
		made of steel	≤ 16
	Electrical installation conduits made of plastic	single	≤ 32 with or without cables
		bundled	≤ 100, conduit Ø ≤ 32, with or without cables
	Electrical installation conduits made of steel	single	≤ 32 with or without cables
	Coaxial cables and wave guides	CommScope HELIAX®	≤ 51.1
		RFS CELLFLEX®	≤ 50.3
		RFS RADIAFLEX®	≤ 48.2
	speedpipes		≤ 50, single Ø ≤ 14

Technical manual

Technical manual

Walraven Pacifyre® MWB System 2 x 50 mm

2.3 Multilayer pipes

Type of pipe	Diameter [mm]
Henco	≤ 63.0
FRÄNKISCHE alpex L, FRÄNKISCHE alpex F50	≤ 75.0
Geberit Mepla	≤ 75.0

2.4 Non-combustible pipes

Pipe material	Diameter [mm]
Copper, steel, stainless steel, cast iron	≤ 88.9
Steel, stainless steel, cast iron	≤ 219.1

2.5 Other services

Service	Dimensions
HVAC split line combinations	Copper pipe ≤ 2 × Ø 22 mm, + 9 mm PE foam + 1 pipe PVC-U Ø ≤ 25.0 + ≤ 2 × cable Ø ≤ 21.0 mm or 3 × cable Ø ≤ 14.0 mm

Technical manual

Walraven Pacifyre® MWB System 2 x 50 mm

3. Thicknesses, sizes and spacing

Dimensions					
	Wall [mm]	Floor [mm]	Timber wall [mm]	Timber floor [mm]	Sandwich panel wall [mm]
Thickness of building element	≥ 100	≥ 150	≥ 100	≥ 150	≥ 120
Thickness of penetration seal	≥ 100	≥ 150	≥ 100	≥ 150	≥ 100
Maximum dimensions of the aperture (width x height)	2200 x 1100 / 1100 x 2200, without cladded aperture edge: 800 x 600 / 600 x 800	2600 x 1000 / ∞ x 800	1000 x 600 / 600 x 1000	1000 x 600 / 10000 x 400	1000 x 1000
Distance to other penetration seals	≥ 100	≥ 100	≥ 100	≥ 100	≥ 100
Distance to other apertures or installations	≥ 200	≥ 200	≥ 200	≥ 200	≥ 200

The total allowable cross section of the installations (outer dimensions) is ≤ 60% of the construction aperture.

3.1 Initial supports

Penetrating services must be supported at the distances specified in the table below. In wall constructions support is required on both sides. In floor constructions support is required on the upper side of the floor. Essentials parts of the supports must be non-combustible.

Initial supports	Wall	Floor
Cables, cable bundles, cable support structures		≤ 650
Electrical installation conduits with fire protection wrap Walraven Pacifyre® NCP Wrap		≤ 250
Electrical installation conduits with fire protection collar Walraven Pacifyre® AWM II+		≤ 500
speedpipes for glass fibre cables and micro cables		≤ 250
Combustible pipes	≤ 500	≤ 650
Multilayer pipes		≤ 650
Non-combustible pipes with section insulation made of mineral fibre mats or shells	≤ 650	≤ 850
Non-combustible pipes with section insulation made of FEF		≤ 500
HVAC split line combinations		≤ 250
All specifications in mm		

4. Spacing requirements for services

NOTE:

In timber components and sandwich panel walls, services must be installed at a distance of ≥ 100 mm to the aperture edge.

Spacing requirements in walls and floors

	Single cables	Cable bundles	Cable support systems	Coaxial cables and wave guides	Speedpipes	Electrical installation conduits, single, made of steel	Electrical installation conduits made of plastic, single/bundled	Combustible pipes	Non-combustible pipes with FEF insulation	Non-combustible pipes with lamella mat insulation	Multilayer pipes	HVAC split line combinations	Aperture edge	Upper	Lower	Side	
	Single cables	≥ 0	≥ 0	≥ 0	≥ 100	≥ 25	≥ 75	≥ 75	≥ 20	≥ 100	≥ 50	≥ 100	≥ 100	≥ 0

All specifications in mm. All specifications refer to distances between the respective insulations and additional measures if applicable.

Technical manual

Walraven Pacifyre® MWB System 2 x 50 mm

5. Included products

Walraven Pacifyre® MWB-A Coating

5 kg pail – Art. no. 2139400005
12.5 kg pail – Art. no. 2139400001

**Walraven Pacifyre® EFC Endless Collar**

Set with 10 m fire protection strip, 3 m stainless steel strap and 18 fasteners – Art. no. 2132100700

Walraven Pacifyre® MWB-A Filler

310 ml cartridge – Art. no. 2139400003

**Walraven Pacifyre® MWB 50 1-S**

Pre-coated on one side with Walraven Pacifyre® MWB-A
Dimensions 1000 x 600 x 50 mm
Box with 4 pcs. – Art. no. 2139400050

**Walraven Pacifyre® NCP Wrap
Fire protection wrap**

Roll, 5 m x 125 mm
(separable into 2 x 62.5 mm)
– Art. no. 2136300050
Roll, 10 m x 125 mm
(separable into 2 x 62.5 mm)
– Art. no. 2136300100

**Mineral wool A1**

Reaction to fire class in acc. with EN 13501-1: A1
Melting point ≥ 1000 °C

Walraven Pacifyre® ID-card

1 piece – Art. no. 2149999xxx

**Mineral fibre board
in acc. with EN 13162**

Criteria: density ≥ 150 kg/m³
Reaction to fire class A1 in acc. with EN 13501:1
Melting point ≥ 1000 °C.
(TR10) tensile strength vertical to board surface ≥ 10 kPa according to EN 1607
Thickness ≥ 50 mm

5.1 Declarations of Performance

The Declarations of Performance for the featured products are available for download on our website:
www.walraven.com/pacifyre

Technical manual

Walraven Pacifyre® MWB System 2 x 50 mm

6. Design

6.1 Fire resistance classes

Walraven Pacifyre® MWB System 2 x 50 mm meets the requirements of max. class EI 120 in acc. with EN 13501-2.

The fire resistance class of the sealing system is reduced to the fire resistance class of the installed service with the lowest fire resistance rating.

The fire resistance class of the sealing system is reduced to the maximum fire resistance class of the surrounding building element.

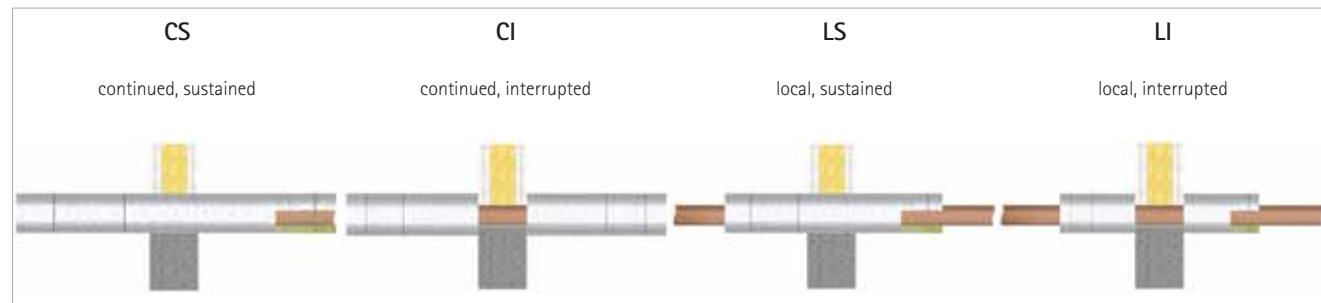

Building element	Fire resistance class
Plasterboard wall	max. EI 120
Plasterboard wall (without cladded aperture edge)	max. EI 90
Solid wall	max. EI 120
Solid floor	max. EI 120
Timber wall (CLT)	max. EI 90
Timber floor (CLT)	max. EI 90
Sandwich panel wall	max. EI 120

6.2 Pipe end configurations

Non-combustible pipes		included configurations			
tested		U/U	U/C	C/U	C/C
U/U		✓	✓	✓	✓
U/C		-	✓	✓	✓
C/U		-	-	✓	✓
C/C		-	-	-	✓

Combustible pipes		included configurations			
tested		U/U	U/C	C/U	C/C
U/U		✓	✓	✓	✓
U/C		-	✓	-	✓
C/U		-	✓	✓	✓
C/C		-	-	-	✓

6.3 Pipe insulation configurations

Results for LS insulation are also applicable to CS insulation.

Results for LI insulation are also applicable to CI insulation.

Technical manual

Walraven Pacifyre® MWB System 2 x 50 mm

7. Design variants

The sealing system may be used to close apertures without installations (reserve penetration for subsequent configurations).

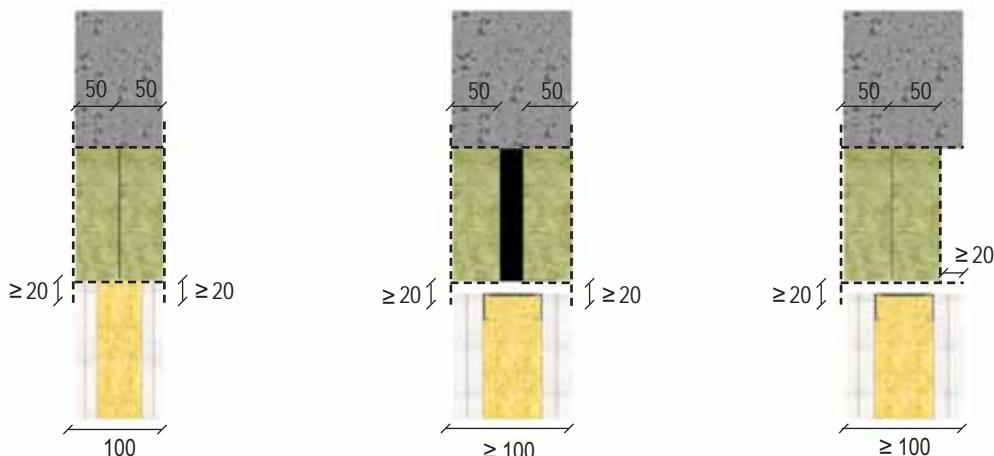

It is not necessary to clad the aperture opening in plasterboard walls. The maximum seal size is then reduced to 600 x 800 mm or 800 x 600 mm (see chapter "Thicknesses, sizes and spacing" on page 8).

Pieces of the mineral fibre boards must be coated with Walraven Pacifyre® MWB-A so that they are glued together. The edges of the mineral fibre boards and/or the aperture edge must be coated with Walraven Pacifyre® MWB-A so that the boards are glued to the building element.

Final coating of the outer board surface and a surrounding area of ≥ 20 mm with Walraven Pacifyre® MWB-A (dry film thickness 1.0 mm). It is not necessary to glue the board layers together.

Sealing of annular gap: ≤ 5 mm by filling the entire depth with Walraven Pacifyre® MWB-A, > 5 mm by filling with loose mineral wool and coating with Walraven Pacifyre® MWB-A (dry film thickness ≥ 1 mm).

Design variants for plasterboard walls and solid walls

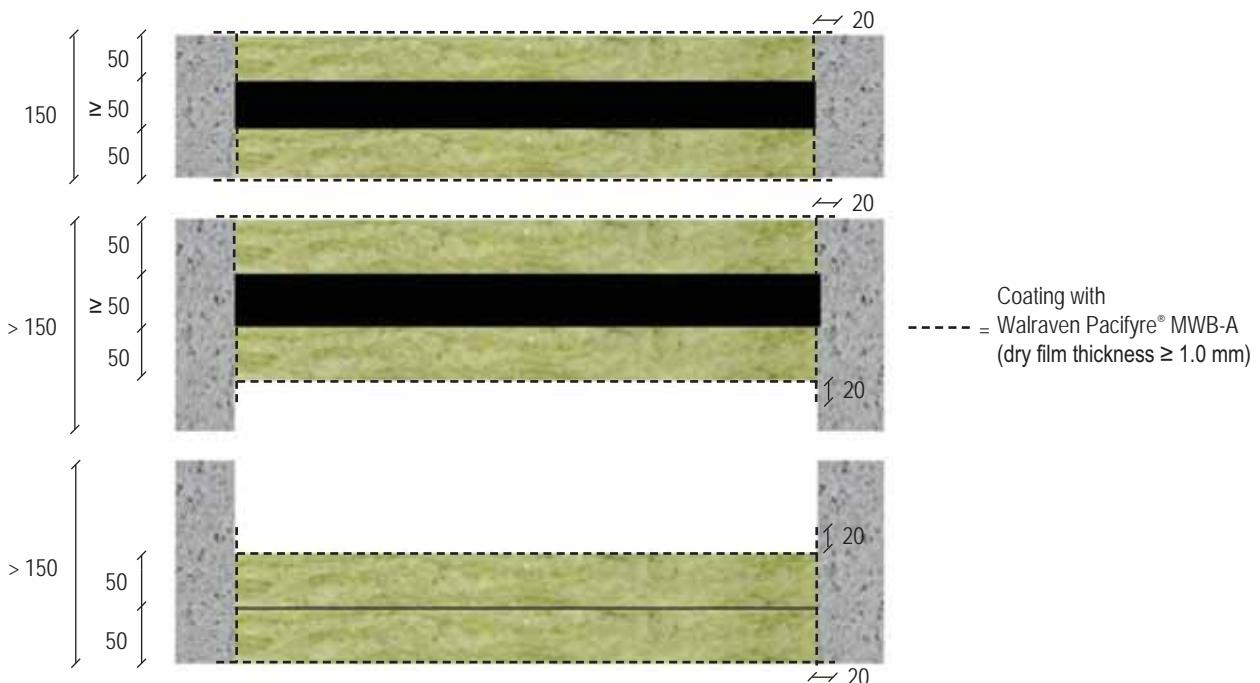

----- = Coating with Walraven Pacifyre® MWB-A (dry film thickness ≥ 1.0 mm)

All specifications in mm

Technical manual

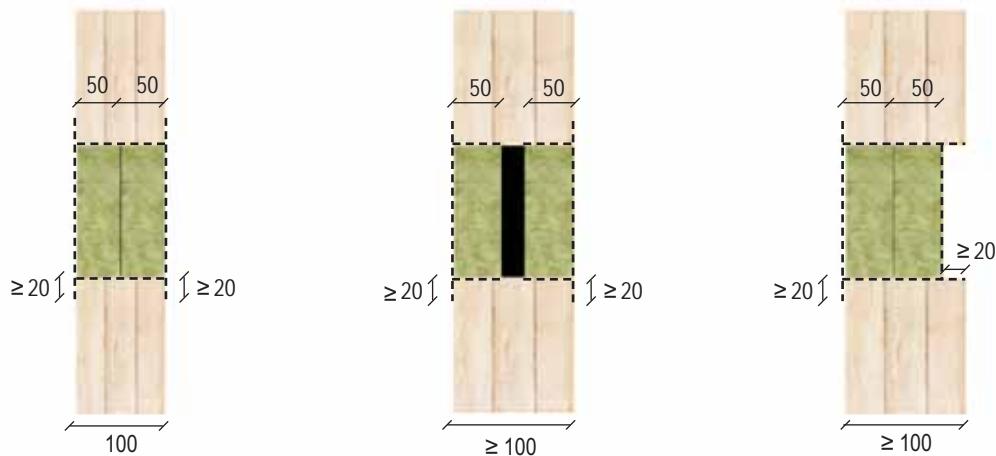

Walraven Pacifyre® MWB System 2 x 50 mm

Design variants for solid floors

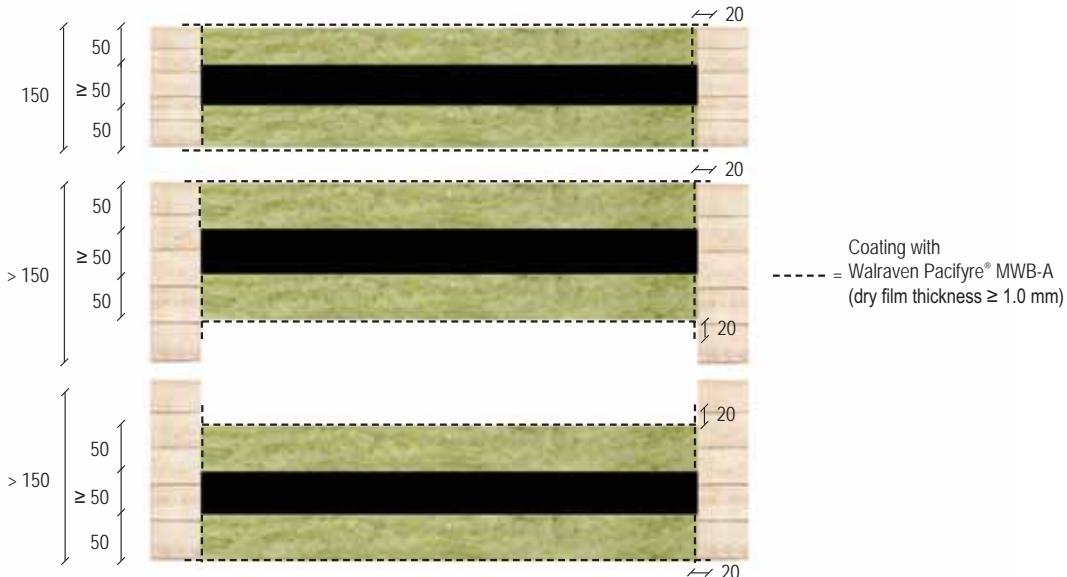

All specifications in mm

Design variants in timber walls

All specifications in mm

Technical manual

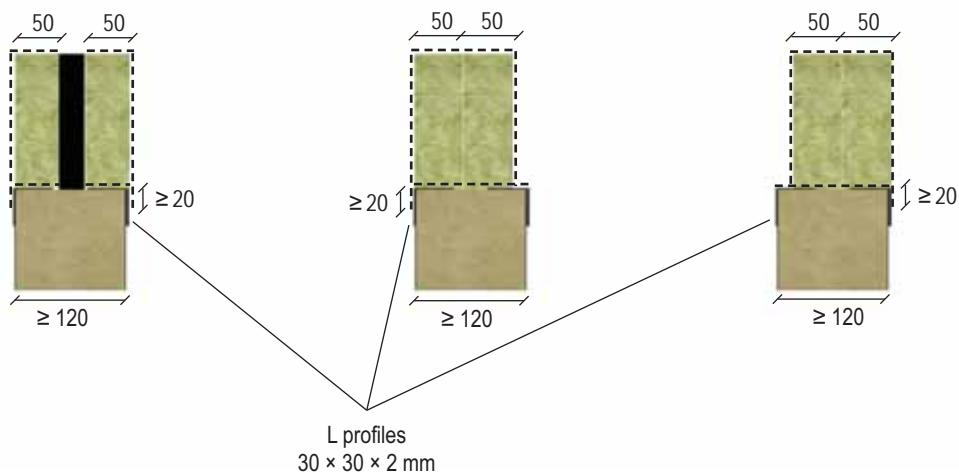

Walraven Pacifyre® MWB System 2 x 50 mm**Design variants in timber floors**

All specifications in mm

In timber walls and floors, the spacing distance between applied services and aperture edge must always be at least 100 mm (see chapter 5, Spacing requirements for services).

Design variants in sandwich panel walls

----- = Coating with Walraven Pacifyre® MWB-A
(dry film thickness ≥ 1.0 mm)

All specifications in mm

On both sides of the seal, L profiles with the dimensions $30 \times 30 \times 2$ mm must be attached alongside the aperture edge fixed every 150 mm to the wall cladding with sheet metal screws.

In sandwich panel walls, the spacing distance between applied services and aperture edge must always be at least 100 mm (see chapter 5, Spacing requirements for services).

Technical manual

Walraven Pacifyre® MWB System 2 x 50 mm

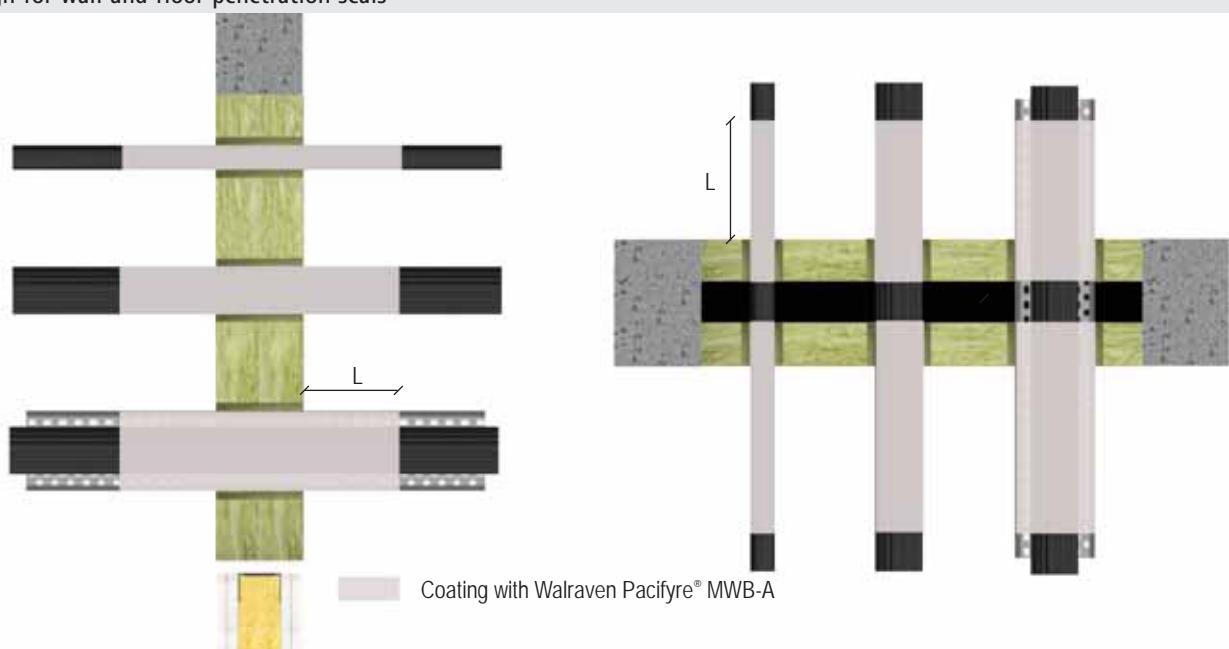

8. Fire protection measures

8.1 Cables / cable bundles / cable support systems

Cables and cable bundles may be installed with or without cable trays.

It is not necessary to fill the interstices of the cables if the bundle consists of parallel-running cables that are tightly packed, tied, stitched or welded together.

In the penetrated area (inside the mineral fibre boards), all cables must be coated with Walraven Pacifyre® MWB-A (dry film thickness ≥ 1.0 mm). It is not necessary to coat single cables (subsequent installation) $\emptyset \leq 21$ mm.

Design for wall and floor penetration seals

For building element and seal thicknesses see page 8. For design variants see page 14.

All specifications in mm

Service	Diameter [mm]	Fire protection coating Walraven Pacifyre® MWB-A		Fire resistance class	
		Dry film thickness [mm]	Length of coating in front of seal L [mm]	Wall	Floor
Single cables (subsequent installation)	≤ 21	-	-	EI 120	EI 120

	made of plastic	≤ 16	≥ 100	EI 120 U/U	EI 120 U/U

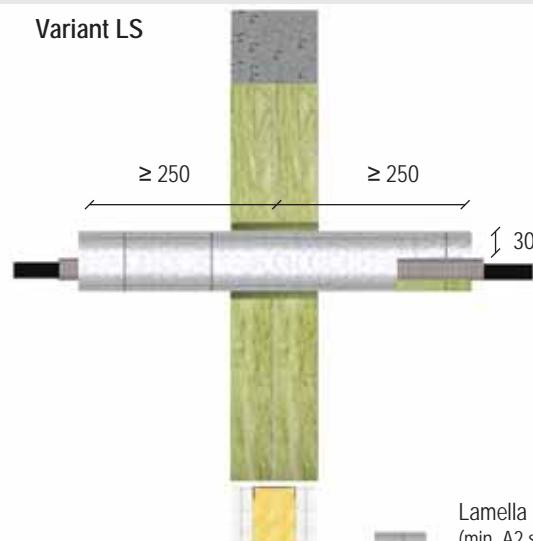

Technical manual

Walraven Pacifyre® MWB System 2 x 50 mm

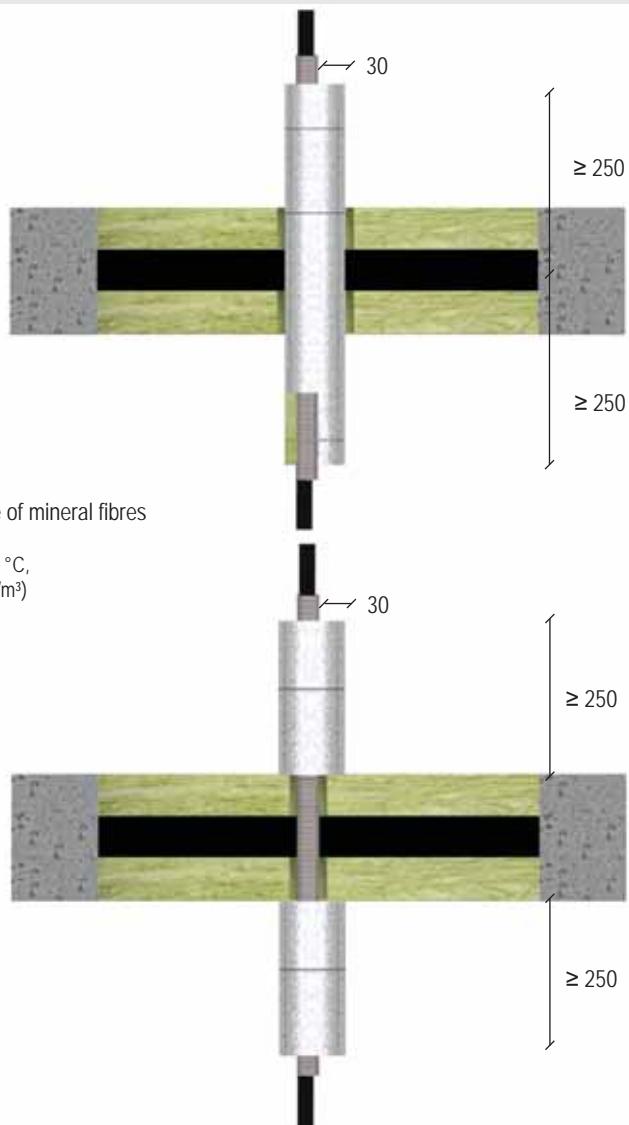

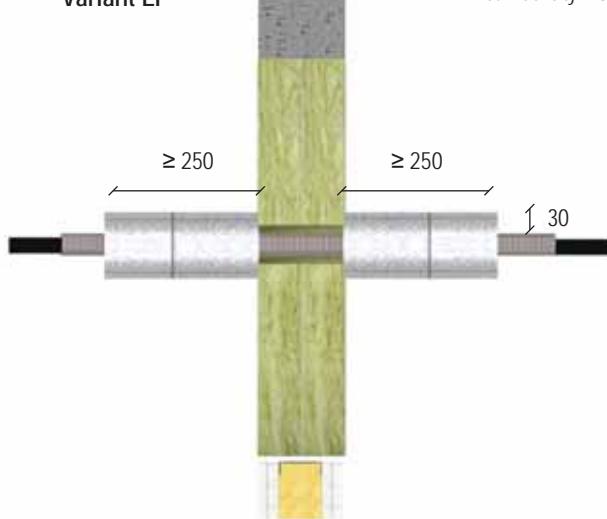

8.2 Electrical installation conduits

8.2.1 Conduits made of steel

Conduits made of steel must be sealed on both sides in walls and on the lower side in floors at a depth of 15 mm with mineral wool and Walraven Pacifyre® MWB-A . Conduits made of steel must protrude at least 350 mm from the seal. The lamella mat must be secured with winding wire against falling out.

Design for wall and floor penetration seals**Variant LS**

Lamella mat made of mineral fibres
(min. A2,s1,d0;
melting point $\geq 1000 \text{ } ^\circ\text{C}$,
bulk density $\geq 35 \text{ kg/m}^3$)

Variant LI

For building element and seal thicknesses see page 8. For design variants see page 14.

EIC made of steel – multiple penetration in linear arrangement	≤ 3 EIC $\emptyset \leq 32$ with/without cables ($\emptyset \leq 21$)			EI 90 / E 120 U/C	EI 120 U/C

Technical manual

Walraven Pacifyre® MWB System 2 x 50 mm

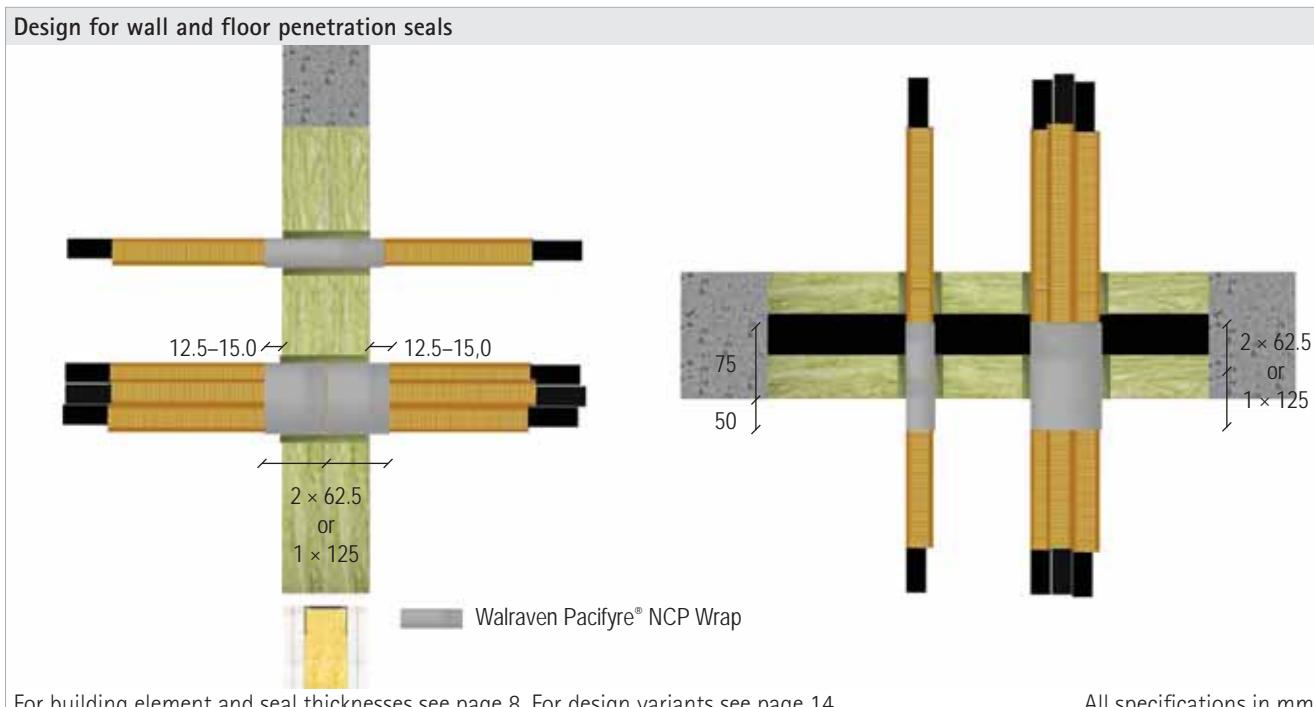

8.2.2 Electrical installation conduits made of plastic with fire protection wrap Walraven Pacifyre® NCP Wrap

Electrical installation conduits made of plastic must protrude at least 200 mm from the seal.

Electrical installation conduits must be wrapped with the fire protection wrap Walraven Pacifyre® NCP Wrap.

The fire protection wrap Walraven Pacifyre® NCP Wrap is coated on one side and equipped with a protective film. The film must be removed before applying the wrap with the coated side facing inwards.

For easier installation the wrap can be secured against falling out with duct tape or winding wire.

For building element and seal thicknesses see page 8. For design variants see page 14.

All specifications in mm

Service	Dimensions	Fire protection wrap Walraven Pacifyre® NCP			Fire resistance class

Technical manual

Walraven Pacifyre® MWB System 2 x 50 mm

8.2.3 Electrical installation conduits made of plastic with fire protection collar Walraven Pacifyre® AWM II+

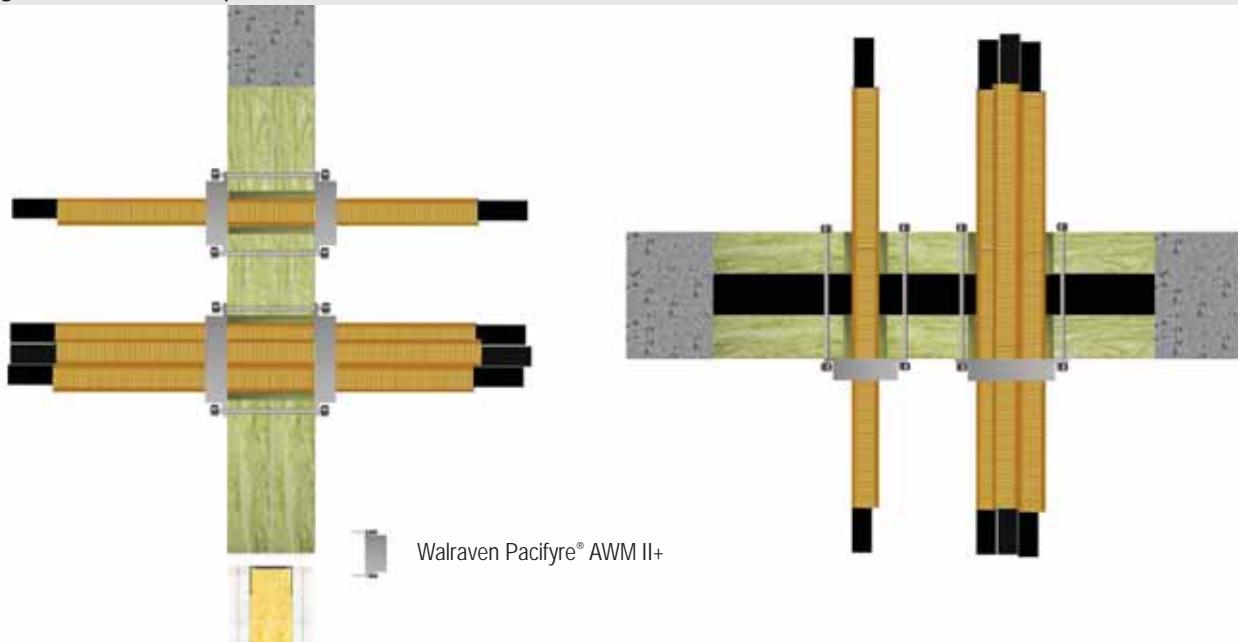

Always use the smallest collar fitting the diameter of the conduit or bundle of conduits.
(Distance between collar and conduit ≤ 15 mm).

Collars must be fastened to the seal with continuous threaded rods Ø M6–M8.

The ends of the conduits must be sealed on one side with Walraven Pacifyre® MWB-A ≥ 10 mm. Conduits without cables must be filled with mineral wool (≥ 10 mm) and sealed with Walraven Pacifyre® MWB-A (≥ 1 mm).

Bundles of conduits (minimum length on both sides of the seal 200 mm) must be fastened on both sides of the seal with for example self-adhesive tape or plastic cable ties after max. 100 mm.

Design for wall and floor penetration seals

For building element and seal thicknesses see page 8. For design variants see page 14.

Services	Dimensions [mm]	Fire protection collar Walraven Pacifyre® AWM II+	Fire resistance class

Technical manual

Walraven Pacifyre® MWB System 2 x 50 mm

8.2.4 Electrical installation conduits made of plastic with Walraven Pacifyre® MWB-A coating

Electrical installation conduits made of plastic must protrude at least 200 mm from the seal.

All conduits must be coated in the penetrated area (inside the mineral fibre boards) as well as on both sides of the seal at a length of ≥ 150 with Walraven Pacifyre® MWB-A (dry film thickness ≥ 1.0 mm).

The ends of the conduits must be sealed on one side with Walraven Pacifyre® MWB-A ≥ 10 mm. Conduits without cables must be filled with mineral wool (≥ 10 mm) and sealed with Walraven Pacifyre® MWB-A (≥ 1 mm).

8.5 Combustible pipes

8.5.1 Design with fire protection collar Walraven Pacifyre® AWM II+

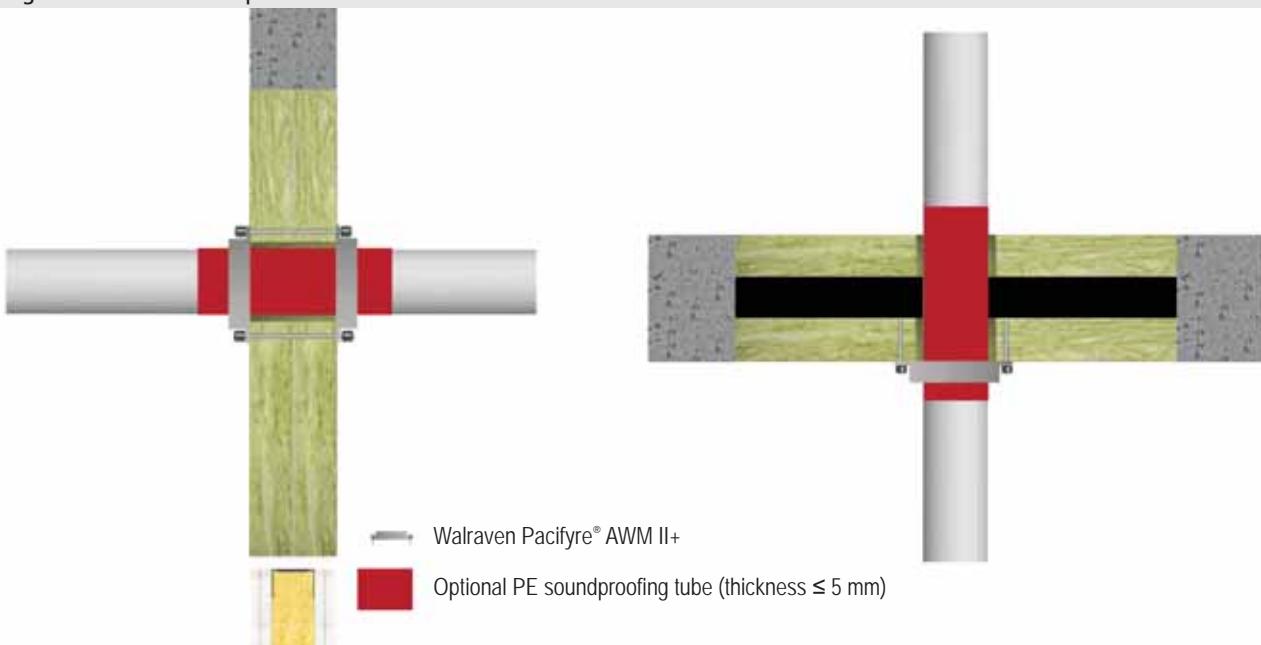

The fire protection collar must be attached on both sides in walls and on the lower side in floors. Always use the smallest fitting collar.

The collars must be fastened to the seal with the following coarse thread screws:

- Würth ASSY D (8 x 70 mm)
- HECO-TOPIX-plus (8 x 80 mm)
- SPAX T-STAR plus (8 x 80 mm)

or equivalent.

Technical manual

Walraven Pacifyre® MWB System 2 x 50 mm

8.6.2 Design with fire protection collar Walraven Pacifyre® EFC Endless Collar and FEF insulation

The fire protection collar must be attached on both sides in walls and on the lower side in floors. Always use the smallest fitting collar.

The collars must be fastened to the seal with the following coarse thread screws or coil spring fasteners:

- Würth ASSY D (8 x 70 mm)
- HECO-TOPIX-plus (8 x 80 mm)
- SPAX T-STAR plus (8 x 80 mm)

or equivalent.

Design for wall and floor penetration seals

Wall

Service		Insulation	Walraven Pacifyre® EFC		Fire resistance class

Technical manual

Walraven Pacifyre® MWB System 2 x 50 mm

9. Installation steps

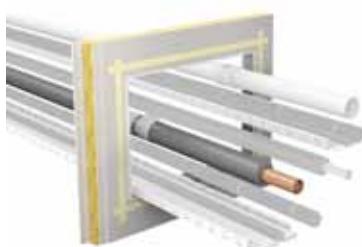

1. Clean the aperture edge. When installing in sandwich panel walls, attach L profiles with the dimensions 30 x 30 x 2 mm alongside the aperture edge on both sides of the seal.

2. Mask the aperture with crepe tape on all sides, keeping 20 mm distance to the edge. Coat the cables with Walraven Pacifyre® MWB-A.

3. Apply the required fire protection wraps to non-combustible pipes.

4. Cut mineral fibre boards to size (make cut-outs for the installations).

5. Coat the edges of the mineral fibre boards with Walraven Pacifyre® MWB-A and firmly place boards in position.

6. Seal the remaining opening/joints with mineral fibre or fill them with Walraven Pacifyre® MWB-A.

Technical manual

Walraven Pacifyre® MWB System 2 x 50 mm

7. Apply lamella mat insulation to pipes, if necessary.

8. Final coating with Walraven Pacifyre® MWB-A.
Install pipe collars if necessary.

9. If required, label the penetration seal.
Fill out the label neatly and attach it firmly next to/above
(not on) the penetration seal.
