

Increase your
installation efficiency

Walraven RapidStrut®

A complete rail system for versatile
medium weight applications

Walraven RapidStrut®

Inspired by smart solutions from the start

Walraven is a globally active company in the installation industry, founded in 1942. We have always been dedicated to make the work of our customers easier and more effective. With simple and smart solutions, comprehensive services and excellent support.

Walraven. The value of smart

Walraven RapidStrut®

For all medium weight applications

Walraven RapidStrut® is our complete rail system supporting medium loads for versatile indoor and outdoor use.

It seamlessly integrates with an extensive choice of pre-assembled accessories that enable you to save installation time.

Also available with the more sustainable and high performance Walraven BIS UltraProtect® 1000 surface protection.

Walraven RapidStrut®

Features & benefits

Easy, quick & safe to install

- The accessories of Walraven RapidStrut® are pre-assembled and delivered ready to use on-site.
- The plastic spring of the fixing system allows the slide nut to be fixed easily into the rail, retaining the assembly in place before final tightening.
- Easy to connect to walls and ceilings by using concrete screws Walraven W-LX-P in the special 8.5 mm anchor holes of the rails.
- In combination with the Walraven DS 5, the Walraven RapidStrut® profile allows quick fixings to be mounted on both sides of the rail.

Sustainable for indoor and outdoor use

- Our experts have used the optimal amount of steel which results in a clean design and a sustainable rail system.
- Walraven RapidStrut® is highly corrosion resistant, and therefore also suitable for outdoor use.
- Available with Walraven BIS UltraProtect® 1000 - the high performance and sustainable surface protection. This technology uses 55% less resources compared to conventional hot dip galvanisation.

Extensive, high-quality range

- The Walraven RapidStrut® fixing system offers a versatile choice for rail profiles and cantilever arms, including a broad range of accessories.
- The strong teeth ensure strong and safe connections.
- Minimal trumpet effect after cutting due to the gentle roll-forming process on our machinery. This also ensures easy installation of the accessories.
- Traceability coding ensures quality management.

Additional service & support

Technical design support

- Our Technical Support Team helps you find the most effective solutions for your construction challenges. We can also provide you with CAD / BIM data where needed. For the best possible result, it is important to engage us as early as possible in your project.

Prefabrication service

- To save you even more time on-site, we offer a prefabrication service for larger installations.

Walraven BIS UltraProtect® 1000

In order to protect your installations against harsh conditions, a durable surface protection is needed. Hot Dip Galvanising is often used, but not always the most **sustainable** option.

Our unique Walraven BIS UltraProtect® 1000 is our answer to a more durable, more sustainable, smoother and more versatile **surface protection** that combines easily with other products.

Sustainable alternative

Walraven BIS UltraProtect® 1000 is the sustainable alternative to the traditional hot dip galvanisation process.

- Seven times less energy use
- No use of tap water
- Own water cleaning system
- Emission of cleaned air
- Up to 55% resources savings

Smooth and versatile

Products feel smooth and are visually appealing. Moreover, the applications are versatile.

- Also suitable for threaded products
- It perfectly matches with products in the Walraven BIS UltraProtect® 1000 system
- Also combines with zinc plated pre-galvanised or hot dip galvanised products

* Until the occurrence of maximum 5% red rust and with a layer thickness of 50 - 80 µm.

Optimal durability

Proven to be suitable for corrosive environments.

- Corrosion resistance class C1-C4 in accordance with ISO 12944-2
- Effortlessly withstands a salt spray test of at least 1000 hours in line with ISO 9227 *

Salt spray test

Walraven RapidStrut® system

A complete range of seamlessly integrated solutions

All our products are developed to combine effortlessly with Walraven accessories and our other products in order to build the perfect solution for your project.

Walraven RapidStrut® G2 Accessories

For pipe fixing & rail construction

Installation – insert, lock, done!

Features and benefits

- Quick and easy fixing to the rail
- Pre-assembled 'ready-to-use'
- Suitable for all Strut profiles
- Saves up to 40% fixing time!
- Optimised for easy installation with electrical tools
- Walraven BIS UltraProtect® 1000 protection for indoor and outdoor use

Walraven PushStrut

Walraven PushStrut

The quick and safe way to connect

- Timesaving and flexible
- For easy installation of complex rail constructions
- Less parts to do your job
- Products always fit together

Walraven PushStrut Button

66519910

- Universal button: easily combined with all common Strut profiles and all Walraven PushStrut Connectors
- Teeth with force fit connections offer more stability
- Max. allowed load (Fa,z) 5,000 N, shear load 3,000 N*

* The max. allowed load (Fa,z) refers to rails and cantilever arms with a material thickness of 2.5 mm. The Fa,z at a thickness of 2.0 mm profile thickness = 4,500 N. The Fa,z at a thickness of 1.5 mm profile thickness = 3,500 N.

Assembly instruction

Walraven PushStrut

Easily combined with all common Strut profiles

Walraven PushStrut Connector Flat 90°/135°

- Flexible use of hole pattern
- Quick and easy to install

Walraven PushStrut Wall Plate

- Stable connection of rails to floor, ceiling or wall
- Timesaving and flexible

Walraven PushStrut Connector Angle Bracket

- Stable rail connection due to fixing to the building

Walraven PushStrut Connector 90° 2-2

- Lateral edges offer great stability
- Flexible use of hole pattern

Walraven PushStrut Connector 90° 4-4

- Lateral edges offer great stability
- Flexible use of hole pattern

Walraven PushStrut Connector T

- Stable T-connection due to lateral edges
- Flexible use of hole pattern

Walraven PushStrut 3D Connector 6-3-3-L

- 3D-Connector for complex frame and rail constructions
- Universal and simple use
- Easy to remove and reusable

Walraven PushStrut 3D Connector 6-3-3-R

Walraven PushStrut 3D Connector 6-6-3-3

The right combination

Walraven Heavy Duty Clamps

Due to its robust design and solid locking the Walraven Heavy Duty Clamps are perfectly equipped for fixing heavier pipes. The range includes a clamp for each common pipe size. The locking nut is captive, hidden in a plastic nut holder. Moreover the locking screws are provided with anti-loss washers. No more time wasted with incomplete clamps!

Stainless Steel

Stainless Steel is specifically designed to be placed in highly corrosive environments as well as spaces with high hygiene standards and possible chemical exposure.

We understand the complexity of selecting the right material in corrosive environments. If you need any help with selecting material, please reach out to us. For more information look at walraven.com/en/stainless-steel.

Additional service & support

From engineering to on-site construction support

Technical design support

Based on your individual requirements our Technical Support staff will deliver you a well grounded proposal with detailed calculations, BIM content, AutoCAD drawings and parts lists.

At Walraven, our service does not end after you have purchased your products. We pride ourselves on our invaluable after sales support and technical advice.

The Walraven specialists are always ready to support!

Prefabrication service

Cutting, grinding, drilling, measuring, they all cost a lot of time on the building site. Not to mention the costs of lost materials or faults. We can prefabricate solutions for you and deliver them directly to the building site.

Find out how we can support you

Would you like to find out more about any of the solutions described in this brochure?
Or would you like to discuss how we could help you find the best possible solution for your project?
