REACH : WALRAVEN STATEMENT

Dear Customers,

The European Regulation of 18th December 2006 *concerning the Registration, Evaluation, Authorisation and Restriction of Chemicals (REACH)* entered into force on 1st June 2007.

This Regulation rules the use and placing on the European market of certain chemical substances, on their own or contained in preparations or articles, with the aim of identifying their hazardous properties and recommending appropriate risk management measures all along the complete supply chain.

Accordingly, any Legal or physical person established in Europe who manufactures or imports a substance covered by REACH, either on its own or in a preparation or article, in quantities of one Metric Tonne or more per year, shall submit a registration file to the European Chemical Agency (ECHA).

All European Walraven companies, manufacturing, importing or using chemical substances covered by REACH, are concerned by this European Regulation and will use their best efforts to comply with it, without compromising their commercial relationships with customers.

To achieve this aim, Walraven made an inventory of the substances covered by REACH. We are also carrying out a purchasing risk management, in order to make sure that the consequences of REACH for our upstream supply chain will remain under control, especially regarding SVHC (*Substance of Very High Concern*).

We like to draw your attention that the goods supplied to your company are considered as *articles* in the sense of REACH.

Within the exception of those articles mentioned in Attachment 1; there are no Substances of Very High Concern from the Candidate List above the current appropriate European thresholds in the products we supply.

We are constantly monitoring the Candidate List of SVHC and will inform our customers in case of inclusion of a substance contained in our products, as foreseen in the REACH regulation.

Johan Gijsman

Group Director Marketing J. van Walraven Holding B.V.
